Amazon Alexa Could Make These Smart Glasses Way Better Than Google Glass

By **LISA EADICICCO** January 10, 2018

Amazon's Alexa software has already made its way into just about every Internet-connected device you can imagine, like smartwatches, lamps, and refrigerators, to name just a few. Next, Amazon's voice-enabled digital assistant could live in your glasses.

At CES 2018, wearable display company Vuzix unveiled its latest pair of augmented reality glasses, the Vuzix Blade, which can communicate with Amazon's Alexa assistant. The glasses are set to launch in the second quarter of 2018 for \$1,000.
